Subject: 404 permit- PA Route 219

Laura,
I need to speak to someone in Region III asap regarding a 'may affect' letter for the 404 permit for construction of PA Route 219. Can you point me in the right direction?
Thanks,
Jamie

Subject: Copy of Signed EPA Response to August 1, 2012 Letter

Hi Jamie-

I'm attaching a copy of our signed response for the letter sent August 1, 2012 regarding the economic impact of the Chesapeake Bay initiative and CSO policy and their impacts on the Borough of Gallitzin. Also, I wanted to pass along some additional information on the Chesapeake Bay Innovative Nutrient and Sediment Reduction Grants Program. This information was not included in the letter because it deals with stormwater pollution, but I thought you might be interested in the information nonetheless.

The National Fish and Wildlife Foundation, in partnership with EPA and the Chesapeake Bay Program, annually awards grants of \$200,000 to \$1 million to support innovative, sustainable and cost-effective approaches that dramatically reduce nutrient and sediment pollution to the Chesapeake Bay and its local waterways. For the 2012 grant cycle, priority was given to projects that demonstrate how local governments, partnering with utilities or other partners, can integrate green infrastructure restoration, protection and maintenance into capital improvement programs such as sewer and other utility maintenance and upgrades, flood control projects, and

renovations to other public facilities. Examples of recent awards include: an assessment of aging storm sewer systems in a mid-sized municipality and development of strategies to integrate green infrastructure practices into their program; development of a region-wide stormwater program; and systematic prioritization of the most cost-effective opportunities for stormwater retrofits. More information about the INSRG program may be found at: www.nfwf.org/chesapeake.

The signed letter is attached, please let me know if you have any questions.

Thanks,

Laura
